Solar LED RECHARGEABLE Torch

SolarMaxx Solar compatible LED Rechargeable lights offer a unique combination of renewable power and exceptional performance.

Features:

1. Long life Ni-Cd rechargeable battery.
2. Twin light mode (normal/high light).
3. Compatible with Solar charger.
4. Long range, bright white, Power LED for focussed light.
5. More than 50,000 + hrs of LED life.
6. Strong ABS body.
7. High power focused reflector for long distance coverage.

Notes:

Keep the switch at 'OFF' position during charging.

It is recommended to charge for 12 hours before initial use.

Recharging: For AC charging slide in-built pin, connect it to 220V AC socket. For DC charging insert the solar cable pin in socket provided on the torch.

Power LED
Long Life Battery
Long Range Focussed Beam

SolarMaxx Solar Energy Solutions is amongst the leading providers of Solar Packaged solutions in the form of Solar Water Heating, Solar Lighting and Solar Power Solutions. SolarMaxx Solar Packaged solutions from I4R are a cost-effective investment - wherever you install them!

Our vendor manufacturing facilities are accompanied with trained technicians, qualified engineers and consultants in addition to a full research & development staff.

Maintaining strict compliances, these facilities are equipped with quality control and safety standards.

SolarMaxx Solar Packaged solutions are ideal for residential, commercial, institutional and industrial requirements.

SPECIFICATIONS:

Battery	:	3.6V Ni-Cd Battery
LED Bulb	:	3.3V White Power LED
Charging Time	:	12 (when fully discharged)
Operating Time	:	5 hrs. (on normal mode) 3 hrs. (on high mode)
Charging Voltage	:	220V AC 50 / 60 Hz or 6V DC
Compatible with	:	6V Solar Panel

6 Months
Warranty*
