ABOUT US

Thank you for relying on us since 2008 to make a change...

Our experience in building every kind of solar installation—from **utility-scale solar power plants** and large commercial **rooftop installations** to optimized installations for nonprofits, homes, schools and governments—means less risk for you.

We work with you at every micro step of the way, managing the engineering and construction processes to **meet your project deadlines**. We **test installed systems** to ensure they meet or **Exceed your energy goals**, and we **monitor your solar resources** through cloud-based energy management solutions to give you total visibility over your solar production and energy use.

And, most importantly, we listen to your needs and deploy closed-loop learning to ensure that we are constantly improving and anticipating your evolving energy needs.

This is why SolarMaxx is trusted by leading organizations, utilities and homeowners all around you.

THE CORE BELIEF

Our value system has an impact and our actions create change.

Our mission at SolarMaxx is to solve the world's energy problems and create a sustainable future. Our responsibility towards the society is to deliver greater value in return for their thought for the environment. We are constantly working to fight climate change by accelerating renewable energy production.

SOLARMAXX

VALUE

❖ At SolarMaxx our core principle is building and sustaining long-term relationships

At every step of the way – whether it's inspecting, troubleshooting, maintaining, or repairing your solar assets – we help you make better decisions that protect your investment for the long-term.

❖ Long-term Experience and Expertise

With more than 15 years in solar, SolarMaxx demonstrates leadership in every aspect of the business—from engineering and design to customer service—so you can be rest assured you are partnering with the best.

❖ Delivering True Value

Get the maximum return on your solar investment. At SolarMaxx we promise to deliver high-quality solar products, the industry's best 25-year Combined Power and Product Warranty, as well as policy expertise to maximize your ROI.

❖ Helping You Reach Your Sustainability Goals Faster

SolarMaxx adheres to the highest sustainability standards and practices and can provide expert guidance to help you accomplish your goals in the most efficient and cost-effective manner.

WHY

SOLARMAXX

The MAXX Advantage

SolarMaxx offers a complete range of Solar EPC solutions like design, engineering, procurement, construction, project management, and operations and maintenance.

We offer innovations coupled with world-class technology and best practices that provide efficient and cost-effective engineering solutions. We adopt a consultative approach to our customers' solar energy needs, which enables us to provide customized solutions to meet their requirements on time.

Professional Engineering

Having our own team of in-house professional engineers ensures that our designs are optimized for each customer's specific needs.

Best-in-Class Procurement

As a wholistic solar power solutions provider, SolarMaxx has a thorough vetting process to choose the best components for each project. We have favorable pricing, warranty terms & supply agreements from top-tier vendors that we pass on to our customers. Because of our long standing supplier relationships and negotiation skills, we can deliver best value and quality assurance.

Safe & High Quality Construction

At SolarMaxx, safety, quality, efficiency and clear communication are our top priorities. Our seasoned construction managers deliver accurate work on a dependable schedule, and execute projects with meticulous care and safety. We have a network of preferred subcontractors across each region, giving us the flexibility to mobilize quickly and ensure your project will be built on time and within budget.

Trust and Transparency

We believe in building long-term relationships and providing proactive, honest communication through each project's life cycle. Whether you're an early-stage developer or long-term solar owner, you'll receive complete transparency, project clarity, and real-time performance updates on your project.

ENGINEERING PROCUREMENT & CONSTRUCTION

Turnkey EPC Solutions

SolarMaxx offers a complete range of Turnkey solutions for your utility-scale, rooftop solar projects. Our solutions include solar array designing, engineering, procurement, construction services and further project management consultation and operations & maintenance.

Our turnkey EPC solutions involve building solar power projects from concept and designing to commissioning. We provide end-to-end solutions to our customers including design, engineering, procurement, construction, project management, testing and commissioning, and connecting the solar power project to the electricity grid.

Project Design & Construction Services

Our Balance of System solutions comprise all project design and execution services which may include additional civil, mechanical and electrical works as solutions in situations where the panels have been pre-procured by the customers. Because post installation we assure prompt O&M services.

Procurement Services

SolarMaxx has a long standing record of assisting commercial and industrial clients in every industry with their solar needs. Whether you are interested in procuring our in-house make solar panels or for our state of the art solar panel installation or procurement of globally recognized solar panels and inverters, we encourage you to get in touch at your earliest convenience.

Our specialists offer a free in-depth feasibility study outlining full cost-benefit analysis to help you make the best decision in the interests of your business. Some of our global procurement partners include the likes of **Canadian Solar, Trina, REC, SolarEdge, Sungrow, ABB and others.**

OPERATIONS & MAINTENANCE

Reliably developed, built & maintained

Maintaining relationships that last..

Having worked with the leading equipment manufacturers and constructors in the O&M of solar power stations, we look after our customers' assets as if they are our own – meticulously caring for the useful life of assets, maximizing their profitability, streamlining their performance and availability, and minimizing their consumption and operating costs.

Industry-Leading Operations & Maintenance

SolarMaxx also operates as an independent business to optimize and maintain your solar assets – no matter who build your power plant. We are experts at maximizing the ROI for your solar power systems and offer a complete set of solutions for your power plants management.

Data-Driven Decision Making

SolarMaxx brings a consultative approach and an owner's mindset to operating and maintaining your large-scale solar assets. As your long-term partner, we focus on what matters most – optimizing your system availability, mitigating risk, and proactively investigating and repairing issues that impact the power plant's performance.

Proactive Communication

Our O&M team has built our business around trust and transparency, which drives all aspects of our customer communications – from how we report on your plant performance to our billing process. We use real-time data and user friendly reporting so you have a steady flow of actionable information about your site and portfolio. And we proactively raise issues as they emerge, and follow through consistently and efficiently with processing your concerns.

Performance Monitoring

Our operations center technicians use real-time data, backed by reliable technology that provides user-friendly reporting and enables us to communicate efficiently with system owners.

Repairs & Special Projects

When it comes to large-scale solar operations, we've seen it all: weather damage, soil movement, aging equipment, complex roof replacements, technology upgrades, and many other issues that cause your site to underperform. Our O&M Special Projects team can inspect, troubleshoot, and repair your plant with efficiency, expertise, and transparent communication.

Our Maintenance Packages

Having a comprehensive preventative maintenance plan is the best way to ensure optimal plant performance year round – and an easy way to protect your investment from costly, avoidable repairs. SolarMaxx O&M offers customizable O&M service packages to suit a wide variety of facility needs with respect to warranties, panel washing, vegetation management, and response times.

TURNKEY SOLAR POWER FOR YOU

INDUSTRIAL | COMMERCIAL | INSTITUTIONAL | RESIDENTIAL

We believe that solar is about helping the environment and doing it in a way that makes good business and financial sense. Our large-scale solar solutions deliver outstanding returns on investment.

Whether a solar installation is set up on rooftops at industrial buildings, sports clubs, movie theatres, office buildings, shopping malls or in carparks, they are sustainable, long lasting, easy to maintain and affordable. Allow us to help you manage rising energy costs, gain a leg up over the competition and reduce your reliance on the electricity grid.

OUR CLIENTS

SolarMaxx believes in making a change, to customers, colleagues, partners, investors and all whose lives we touch everyday. We are here to make a positive difference to the environment and society as a whole. We do this by providing exceptional products and services that meet the specific needs of the users. Founded in 2008 in India, SolarMaxx, a brand owned by Illusions4real, is headquartered in Jaipur, Rajasthan. Presenting some of our prestigious clients who always have a peace of mind knowing they are dealing with a highly ranked, reliable service provider.
